

How to Celebrate World AIDS Orphans Day

by **kgob**

Introduction

May 7 is World AIDS Orphans Day. Do your part to spread awareness and support the orphans of the AIDS pandemic.

Instructions

Difficulty: Easy

Steps

Step One

Educate yourself on the disease so you can educate others. Learn how it is and IS NOT spread, that it does not only touch people in the gay community, and how it can be effectively prevented and treated.

Step Two

Speak up when you hear someone say something that wrongly supports the stigma surrounding HIV/AIDS. There is a huge amount of misinformation in popular culture relating to the disease that makes life more difficult for those living with the disease than the disease itself. Prejudice and misinformation is never acceptable.

Step Three

Read books such as *There is No Me Without You* and *28 Stories of AIDS in Africa* to learn about the more personal aspects of the disease and the lives it affects.

Step Four

Financially support organizations that offer services to children with HIV and AIDS throughout the world. It is these children that World AIDS Orphans Day was created for.
